### Sustainability Through Integration

Featuring Manon Meskens  
and Sebastian Moreno

10:00 AM – 11:00 AM (PST)

Starting with Passive House principles, how can we achieve carbon neutrality in our cities? And beyond that, how can we conceive a town like a sustainable ecosystem where each element contributes to a regenerating permanent cycle, alternately a consumer and a producer? Precursor and expert in passive, sustainable, zero energy and carbon neutral buildings, architectural firm A2M will disclose the integration of a large variety of tools to achieve carbon neutrality, and how they use them to produce successful cases throughout Europe, North America, and Africa.

#### Professional development

- Total number of learning hours: 1
