**Working Together
to Achieve Low
Energy Buildings**

Featuring Mark Bernhardt
and Kenneth Chooi

10:00 AM – 11:30 AM (PST)

The Passive House Standard and The Living Building Challenge are two prominent pathways to help achieve our low-energy building goals by 2032. We will highlight the “Crosswalks” document between the two programs that focuses on how designers can incorporate both these standards into their next project. Mark Bernhardt, Bernhardt Construction, and Kenneth Chooi, project architect, will provide an overview of the Green Point Project which is striving to achieve both certifications.
