

ONLINE: Built in Canada: Lessons Learned from PH Projects (BC) – 28 Mar 2022

This session is on Valemount Certified Passive House, a single-family dwelling nestled within the mountainous terrain of interior British Columbia.

The Valemount Passive House was certified by PHI in 2017. Designed by Vincent Siu, Built by Erik Olofsson, and with PH Consulting by Kim Walton, the project is located in the Rocky Mountains west of Jasper. Laura Keil and Andru McCracken have been living in the house for the past 6 years. This presentation will provide an overview of getting a Passive House Single Family Home built in a remote location.

Laura and Andru will share their lived experiences in building and living in a Passive House. They will share their thoughts about what they love about their house, what they would do differently and the drawbacks to living in a Passive House.

Instructors:

Kim Walton, Designer/Principle, Bow Crow Design
Vincent Siu, Architect AIBC LEED.AP, Siu Architecture Inc.
Erik Olofsson, Director, E. Olofsson Construction Inc.
Laura Keil & Andru McCracken, Valemount PH Homeowners
