

UK Passivhaus Conference 2021: Delivering Net Zero through Passivhaus

passivhaustrust.org.uk/event_detail.php

Date: 25 November & 02 December 2021

Time: 14:00 - 17:15 (two consecutive Thursday afternoons)

Location: Online

Cost: PHT member: £50+VAT, Non-member: £100+VAT, Public Sector clients: Free

This winter the 2021 UK Passivhaus Conference, sponsored by lead sponsors ATTMA, Faithful + Gould, Passivhaus Homes, and public sector sponsor Kier Group, is dedicated to exploring the latest best practice & cutting edge research developments. The online event will take place immediately after COP26 on 25 November & 02 December. [Get the dates in your diary!] After exploring the bigger picture of the climate emergency in Glasgow, we shall be driving down into the technical & practical aspects of putting net-zero pledges into action.

Join us online for two Thursday afternoons to discover the realities of delivering Passivhaus.

Who should attend?

This conference is aimed at those interested in designing & delivering Passivhaus projects. The event will have a focus on advanced technical issues:

- All practitioners at the forefront of delivering Passivhaus in the UK & abroad.
- All construction and built environment disciplines ranging from architects, engineers, energy managers, consultants, contractors, clients, and researchers.

- Clients who are looking for actionable solutions to meet their climate action & net-zero declarations. Institutions & Local Authorities interested in procuring Passivhaus.

As the Standard emerges from niche boundaries, many in the building sector are turning to Passivhaus for tackling the climate emergency head-on. In the run-up to COP26, the Trust shall be partnering with several events highlighting the vital role of energy efficiency via the latest Passivhaus developments. Those looking for more introductory information should keep an eye on our event listings for more.

Outline programme

	<u>25 November : How to deliver</u>	<u>02 December : Technical & Futures</u>
